DETAILED ACTION

Information Disclosure Statement

1. Acknowledgement is made of the filing of a Supplemental Information Disclosure Statement (IDS) on 09 August 2000. The cover page to the IDS indicates that the references cited thereon will be provided under separate cover. However, at the time this Office action was being prepared, such references have not been associated with the subject application and accordingly, they have not been considered on the record.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-18 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Still in view of Benson et al., Rothman et al., and Heller.

See the prior Office action for the basis of the rejection.

Response to Arguments

4. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Art Unit: 1655

5. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., "[t]he present invention discloses means for detecting both the combination *and ratios* of dyes composing an individual address" (response at page 3), and "[t]he method disclosed in the present invention would allow monitoring many separate sequencing reactions in a single mixture" (response at page 4, first paragraph)) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

For the above reasons, and in the absence of convincing evidence to the contrary, the rejection is maintained.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1655

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
